[1] Persons at work. Economic reasons include slack work, material shortages, inability to find full-time work, etc.

[2] Total labor force as percent of noninstitutional population (both including resident Armed Forces).

[3] Civilian labor force as percent of civilian noninstitutional population.

*Data beginning 1978 not strictly comparable with earlier data because of revisions in the household survey, which added about 250,000 to labor force and to employment.

Beginning with January 1983 *Economic Indicators*, noninstitutional population, total labor force, and total participation rate include resident Armed Forces rather than total Armed Forces.

[1] Estimates from *The Budget of the United States Government, Fiscal Year 1984*, January 1983.

NOTE.—One substantial change was made in the January 1983 *Budget* in the functional classification: the interest function was changed to net interest. Formerly, the interest function total included all Treasury interest payments, including those made to trust funds. The new net interest functional total is the amount paid by the Treasury to the public. Intragovernmental payments are netted out.
